

As a 39 yr. F/A, I cannot imagine the hostilities that will prevail if cell phone use is allowed on my international flights to Amsterdam and Tokyo. Now we are desperately trying to quell inflight incidents and this would only cause more. This also could cause more concern for inflight safety and security. Please do not allow this to happen. We are in a "tube" for 10 hours and do not need this to add to our safety and security. Enough already, don't need more incidents.
